About Us

Maricopa County Environmental Services

provides essential, regional environmental services seeking to prevent and remove environmental health risks. The Department's Environmental Health Specialists and Field Technicians are in the community every day making sure that among other things, food in all the eating and drinking establishments in the County is protected from contamination, that water supplies throughout the County are safe to drink, and that vector borne health illnesses and risks are minimized. It is our belief that with continued support, future generations will reap the benefits of today's actions.

It's Summer, the Monsoon season is here, and so is the Mosquito Toolkit!

New tools and resources are easily made available to help your community Fight the Bite

Good news! We are excited to announce that Maricopa County Environmental Services is launching a Mosquito Guide & Toolkit to help you in your efforts to Fight the Bite and keep your community safe.

Homeowner Associations, neighborhood, municipalities, and concerned individuals

and groups will now easily find resources on avoiding mosquito bites and taking action to prevent mosquito breeding in your community. We are unveiling the toolkit during the Monsoon season in anticipation of weather conditions that could be conducive to an increase in mosquito activity.

Click on the **Communities** or **Municipalities** tab to find educational resources that may be printed out to share with others or used for posts on **Social Media**.

Need assistance en Español or in 中文 for your food related business?

Nuestros representantes o enlaces para negocios hispanos de venta de alimentos están disponibles para asistirles entendiendo las necesidades culturales de su negocio y asistiéndoles en su idioma.

Do you need to make sure that your ethnic foods meet Maricopa County Health Code standards? Our language liaisons are available to assist you!

如果您與您的食品業務有文化上了解的問題和語言上的困難

The **Media** tab includes articles and videos to review and share. The **Picture** tab has images to include with posts or newsletters. Finally, the social media tab contains draft posts and messages that can be copied and pasted online.

The best time to share these messages is when you notice increased mosquito activity where you live, work, and play. Another critical time to share this information is after a rain event or during the monsoon season.

Click on the **Mosquito Toolkit** or the image below and get ready today!
